SKILLS

Languages:	Java, JavaScript, TypeScript, SQL
Frameworks:	Spring Boot, React.js, Node.js
Tools/Platforms:	Git/GitHub, Docker, Linux, CI/CD, n8n
Soft Skills:	Adaptable, Collaboration, Problem-Solver

PROJECTS

Star Wars Text-Based RPG Battle Engine | Java, Maven Aug 26

- Built a console-based, turn-based RPG battle engine in Java set in the Star Wars universe, with Attack/Defend/Heal actions and a 15% critical-hit system.
- Implemented dynamic enemy scaling and a level-up system (HP/Attack/Defense growth), culminating in a final boss battle after 3 enemy encounters.
- Rendered battles with ASCII art visuals; built and packaged with Maven for Java 21.

DMMV – Dynamic-Memory-Management-Visualiser | Live | React 19, Vite Apr 26

- Browser-based simulator web platform that brings Operating System memory concepts.
- Implementation covers everything from page replacement algorithms, segmentation, virtual memory, dynamic partitioning and thrashing.
- Created structured teaching notes explaining the underlying algorithms and their execution for the demonstration.

Wi-Fi Deauthentication Attack Detector | Python, Scapy, FastAPI, React, Docker Mar 26 – May 26

- Built a Python/Scapy deauthentication-attack detector using a 7-signal heuristic engine with EMA-based adaptive baselines to flag anomalous Wi-Fi traffic in real time, achieving 98% detection accuracy and 100% warning notification on telegram bot.
- Added NVIDIA NIM-based AI classification and exposed results through FastAPI REST/WebSocket endpoints to a React dashboard.
- Automated alerting with n8n cloud workflows and containerized the stack with Docker Compose for live packet capture and kali linux for the self wifi-deauth-attack demonstration.

TRAINING

Cipher Schools (Edtech Company) Aug 26

Java Programming – built a text-based RPG battle engine (Certificate ID: CSW2026-18064)

- Completed hands-on Java training culminating in a console-based, turn-based RPG battle engine project.
- Designed a turn-based combat system with elemental spells, grimoire-based abilities, and scaling enemy encounters using core Java (OOP, collections).
- Structured game logic into reusable classes for characters, spells, and battle state to keep the engine easy to extend.

CERTIFICATES

Node.js Udemy	Aug 26
Ethics in Engineering Practice IIT Kharagpur (NPTEL-SWAYAM)	Aug 26
Java Spring Boot GeeksForGeeks	Jul 26
Full Stack Development Coursera	Jun 26

ACHIEVEMENTS

Omarchy – open-source system-stats plugin contribution Live	Aug 26
GitHub Achievements: YOLO, Quickdraw, Pair Extraordinaire, Pull Shark	Jan 26 – Aug 26

EDUCATION

Lovely Professional University

Bachelor of Technology

Computer Science and Engineering; CGPA: 6.8

Phagwara, Punjab

Aug 24 – Present

DIPS

Senior Secondary- Percentage: 71%

Garhdiwala, Punjab

Mar 22 – May 24

St.Solder Devine public school

Matriculation-Percentage: 72%

Mar 21 – May 22
